EDUCATION

Vellore Institute of Technology, Vellore, TN

Bachelors of Technology in Computer Science and Engineering

Aug 2021 - May 2025

GPA: 9.05/10.0

Green Valley High School, Vadodara, Gujarat

April 2020 - May 2021

Higher Secondary (Class XII)

Percentage: 90.8

Aditya Birla Public School, Kesrol, Gujarat

April 2018 - May 2019

Secondary (Class X)

Percentage: 92.6

EXPERIENCE

AI Variant

Data Science Intern

Aug 2025 - Feb 2026

- Built a Book Recommendation System using cleaned and preprocessed large-scale rating data, applied EDA and collaborative filtering to generate personalized book suggestions.
- Solved real-world data problems including handling missing values, noisy ratings, and ensuring data consistency for reliable model performance.

The Nutriverse

AI Product Intern

Feb 2026 - Current

- Designed and developed a data extraction pipeline to build structured databases by processing content from YouTube videos.
- Responsible for building automated workflows that streamline and support the main application.
- Developed a coding agent that reviews code changes directly from GitHub repositories and generates concise summaries of repository pushes for managers.

PROJECTS

1. Telegram Stock Market Bot

- Built and deployed a production-ready AI assistant that educates users on investing concepts and provides neutral market commentary.
- Implemented application-level safety guardrails, intent routing, and real-time Telegram integration for seamless user interaction.
- Designed conversational workflows to handle stock-related queries while maintaining safe and informative responses.
- Technologies Used: Python, Telegram Bot API, FastAPI, LLMs, APIs.

2. Stock Analyst AI Live Demo

- Developed an AI-powered web application that provides stock insights, analyst recommendations, and latest market news using real-time data.
- Built a multi-agent architecture to handle data retrieval, financial analysis, and response generation efficiently.
- Integrated live market data sources and automated workflows for delivering up-to-date stock information.
- Technologies Used: Python, FastAPI, Streamlit, LLMs, APIs, Pandas.

3. Knowledge Vault

- Developed a local RAG-based conversational AI system capable of ingesting documents and answering queries using user-provided knowledge.
- Implemented retrieval-augmented generation to provide context-aware and hallucination-free responses grounded in uploaded documents.
- Stored and managed vector embeddings using ChromaDB for efficient semantic search and retrieval.
- Technologies Used: Python, LangChain, ChromaDB, LLMs, Vector Embeddings.

SKILLS AND INTERESTS

Programming Languages: C, C++, Java, Python

Scripting Languages: JavaScript, HTML, CSS

Data Visualization: Power BI, Tableau

Machine Learning: Time Series Forecasting, Machine Learning Algorithms, Natural Language Processing

AI: LLM Finetuning, RAG, Agentic AI Framework

Operating Systems: Linux, MacOS, Windows

Soft Skills: Communication, Teamwork, Problem-Solving, Adaptability, Time Management, Leadership

CERTIFICATES

AWS Certified Cloud Practitioner

Issued: January 2024

- Completed the AWS Certified Cloud Practitioner certification, which provides a foundational understanding of AWS Cloud concepts, services, and terminology.
- Demonstrated the ability to explain the value of the AWS Cloud and understand AWS shared responsibility model.

Generative AI with Large Language Models

Issued: October 2025

- Gained hands-on experience working with models like FLAN-T5 and implementing Parameter-Efficient Fine-Tuning (PEFT) for efficient model adaptation.
- Worked on AWS SageMaker for model training and deployment, utilizing AWS CLI commands to import and manage data from S3 buckets.
