ABOUT ME

I am a hard-working and consistent individual who thrives in a team-oriented environment. My passion for coding runs deep, and I am knowledgeable in several programming languages. My attention to detail and dedication to my work enable me to produce high-quality code that meets the project's requirements

INTERNSHIP

- **The Nutriverse** (February 26 - Present)
Product Intern - Designed and developed a data extraction pipeline to build structured databases by processing content from YouTube videos. Responsible for building automated workflows that streamline and support the main application.

PROJECTS

- **Stock Prediction Model**
Developed a stock price prediction system using historical closing prices and technical indicators, building and training time-series and deep learning model
- **Stock Analyst AI**
An AI-powered web application that provides stock insights, analyst recommendations, and latest news using a multi-agent architecture and real-time data. Link - <https://stock-analyst-ai.onrender.com/>
- **Knowledge Vault**
Developed a local RAG-based conversational AI system that allows document ingestion and delivers context-aware, hallucination-free answers grounded exclusively in user-provided data. Saved embeddings in ChromaDB.

CERTIFICATES

- **AWS Cloud Practitioner**
- **GenAI with Large Language Models**
